A little funny. Still correct?

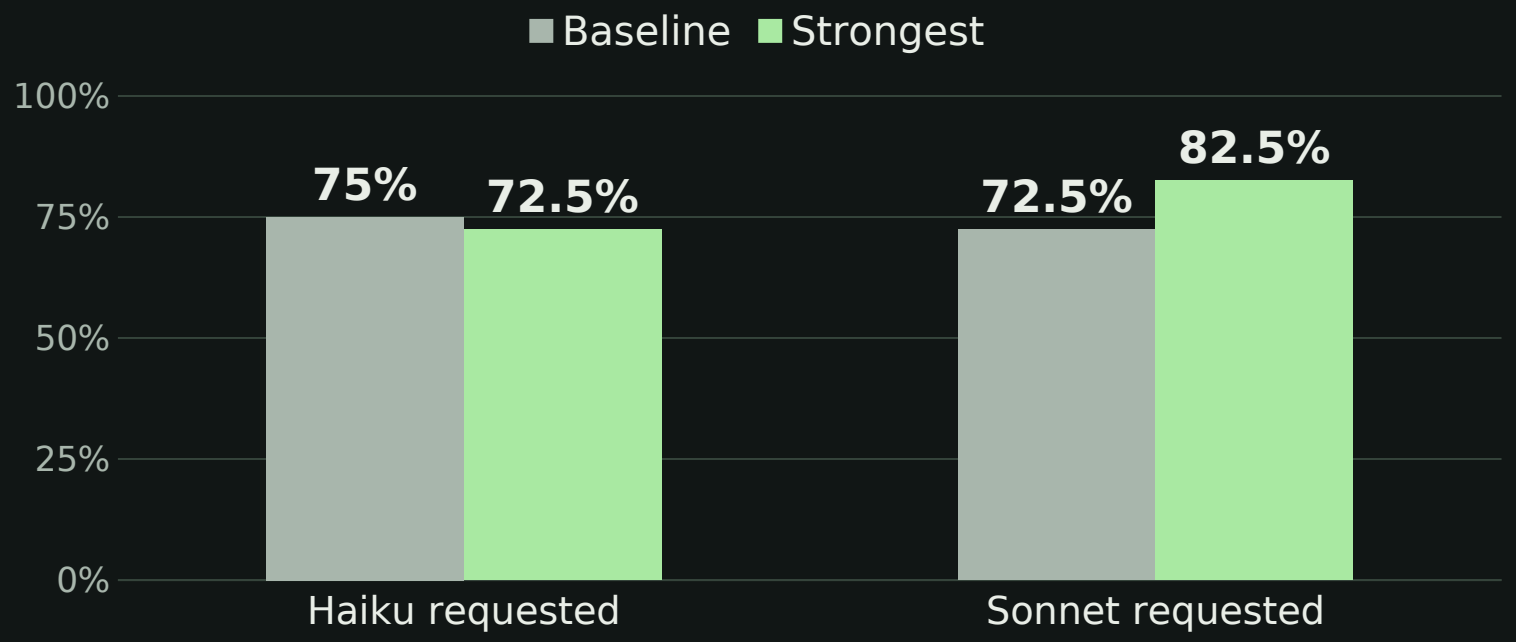

Four humor instructions. The same tasks.

40 healthcare questions + 30 coding problems
2 requested Claude aliases × 4 prompt levels × 1 repeat

560 recorded responses. Prompt-only. Separate model judge for humor.

Healthcare scores moved both ways

Baseline versus strongest humor instruction

−2.5 pp

30/40 to 29/40

+10 pp

29/40 to 33/40

Exploratory, 40 paired items per alias. Sonnet-requested: 4 wins / 0 losses / 36 ties.
Two-sided paired sign test p = .125.

Humor stayed modest

6.67–22.5%

Model-judge rating ≥3/5 in the strongest condition

Below the 50% and 70% targets

Coding: stored 30/30 in every arm. Tests were not independently rerun.

Small public-task pilot. Model identity unresolved. No human or clinical validation.
